

## Vodafone Launches Voice SMS Service

Kunal Gangar

Nov 19 2008

Vodafone India announced the launch of their version of Voice SMS service for subscribers in 16 circles across India. The Voice SMS for Vodafone is powered by Kirusa, where Vodafone (prepaid and postpaid) users will also be able to send Voice SMSes to any mobile subscriber in India for a nominal charge.

The service is very similar to Airtel's offering in terms of usage and features. To send a Voice SMS, a user needs to dial \* followed by the recipient's number. Each Voice message sent will cost 75 paise to the user. The recipient, on the other hand, can listen to the first Voice SMS for free, but subsequent retrievals will cost 75 paise per retrieval.

For more details, you can [check](#) out Vodafone's Voice SMS page.
